APPENDICES

**To Final Report
Computer Technology Project**

H. Summary of Project Procurement

**EXPLANATORY NOTES
APPENDIX H**

The following tables and computer print-outs document the most important procurements conducted for the Tunisia Computer Project. The summary tables and associated detail indicate the major equipment (typically over \$600 in value) by organizational unit or project receiving the equipment within the Tunisia Computer Project, and the subsequent computer print-out details the serial number and exact location.

For purposes of brevity, we have provided three summary tables: a table of major computer hardware, major computer software, and major other items. In addition, following the summary tables and the computer print-outs, we have indicated other procurements that occurred during the 3.6 years. Some of the smaller items were not initially tasked to a particular location within the Tunisia Computer Project, but virtually all items were first brought to IRSIT, checked and cleared through customs, and then allocated to a project, to support equipment, or to a specific pilot project.

In Tunisia, with the computer project files, are maintained a complete documentation on shipping records, atestation de douane, and clearance documents supporting each shipment made by AED to the Tunisia Computer Project.

In other auditable files are contained a matching inventory records on major computer items received by each of the recipient units in March and April of 1991. These records have been compared item-by-item to AED shipping records and computer print-outs.

Following these explanatory notes is a glossary which matches some of the French terms with the equivalent English terms used by equipment recipients.

GLOSSARY

Equipment:

<u>English</u>	<u>French</u>
computer	ordinateur
disk	disque
monitor	moniteur
minitel*	minitel
printer	imprimante
software	logiciel
database	bas de donne
keyboard	clavier

Organizations:

Regional Institute for Informatics and Telecommunications (IRSIT)	Institut Regional des Sciences Informatique et des Telecommunications (IRSIT)
National Center for Informatics (CNI)	Centre National d'Informatique (CNI)
National Institute for Administration and Micro-Informatics (INBMI)	Institute National des Bureautique et Micro Informatique (INBMI)
Gafsa Phosphate Company (CPG)	Companie Phosphate de Gafsa (CPG)
Ministry of Higher Education and Scientific Research (MHESR)	Ministere de l'Education Superieur et de la Recherche Scientifique (MESRS)
National School for Engineering (ENIT)	Ecole National d'Ingenieurs de Tunis (ENIT)
Carthage Institute of Technology (CIT)	Carthage Institut d'Technologie (CIT)

*This is a small terminal device that can be connected directly to a telephone line. It is used in France to provide video information.
