## 1. Executive Summary

The Jordan Restaurant Association (JRA) is a four-year-old mandatory membership association created by the Department of Tourism to represent and serve Jordan's growing Restaurant Industry.

Since its inception, JRA created a small structure to address challenges encountered by classified food establishments that have grown in number over the past few years to reach 529 members employing over 9008 people in 2006.

With this significant growth in membership, the industry matured and witnessed an increased awareness of the specific needs of services and programs necessary for its success.

The mandatory membership structure at JRA, however, caused the association to be less responsive to the specific requirements of its members.

Throughout the past four years, JRA has adopted a reactive approach as opposed to a dynamic proactive approach dedicated to providing quality services for its growing membership base.

Meanwhile, JRA finds itself at a critical juncture. Not only is it expected to upgrade its services to raise the level of Jordan's restaurant industry, it was also identified along with other tourism stakeholders, as an active partner in the implementation of the National Tourism Strategy (NTS) that aspires to double Jordan's tourism economy by 2010.

With this challenge, JRA leadership decided to take action and strengthen the institution to enable it to cope with a growing and vigorous tourism industry.

The three-year Strategic Plan is part of this effort. It outlines new member services and programs that will take JRA to the next level and support the association's vision of transforming the restaurant industry into a powerful and regionally competitive sector that contributes to the growth of the Jordanian tourism economy.

The strategy articulates proposals for new services and programs discussed and approved at a board level throughout the past few months. It also proposes means for the association to generate non-dues income to ensure sustainability of its programs aimed at creating a healthy business environment for the restaurant industry.

#### The five key objectives identified by this plan are:

- Represent members in public advocacy and ensure a customerfriendly institutional and regulatory framework for restaurants.
- Enhance product development and promote skilled human resources.
- Expand JRA business development services to provide professional networking, matchmaking and research services.
- Strengthen outreach to engage members, respond to their needs and expand membership base to include unclassified restaurants and supporting industries.
- Work towards transforming JRA into a voluntary association with excellent operations, management practices and corporate governance.

#### These objectives will be achieved through five strategic departments

- Government Advocacy and Communications
- Career Development and Skilled Human Resources
- Investment and Business Development
- Membership Development and Outreach Department
- Finance and Administration

For JRA to ensure a successful and sound implementation of the five strategies, it is required to evaluate the executive structure that currently does not support the new proactive approach suggested by the strategy.

#### A NEW DYNAMIC OPERATION

A new "strategic" executive structure that supports each of the abovementioned objectives is proposed to enable the new CEO and JRA Board to ensure member satisfaction and sound implementation of programs and services in line with the association's strategic direction.

The association is in the process of recruiting a strong CEO who will lead all departments and support multiple member-led committees, expected to assist JRA in its effort to effectively implement its mission and goals.

It is proposed that the recruitment process takes place in two phases:

Year 1: Recruit two department leaders managing JRA's Membership and Training programs.

Year 2: Recruit Head of Business Development and a senior staff member to assist members and potential investors start and expand their restaurant businesses.

The association's public policy advocacy program would be carried out by an existing staff member who has demonstrated success in building a strong relationship with relevant governmental institutions and tourism stakeholders.

#### JRA'S STRATEGIC DIRECTION

JRA will have a lot on its plate in the coming three years. New programs and services will be introduced, new members will be invited to join and investors will have a venue to help them explore investment opportunities in the restaurant industry.

Following is a summary of the programs and services outlined in this strategy:

#### 1. Government Advocacy and Communications

With the aim of creating a healthy business environment for the restaurant industry, JRA will create an advocacy program that would track changes in legislation affecting the tourism industry and address all relevant policy issues influencing members. It will conduct regular research on issues identified by members as challenges affecting the success of their businesses. Research will be based on direct feedback JRA receives from restaurants through annual needs assessment sessions and surveys. Effective communication is critical to the success of JRA's policy efforts. The association's position on important policy issues will continuously be communicated to policy-makers and other stakeholders through strategic coalitions, the media, roundtable discussions and other communication tools.

#### 2. Career Development and Skilled Human Resources

Training has been identified as a "major need" by the majority of JRA's 592 members with a workforce of over 9008 employees.

JRA's Career Development Department will be equipped to address members' training needs through the following programs:

JRA Training Program

- *General Training*: Training will cover general areas beneficial for the majority of stakeholders in the restaurant industry.
- **Tailored Training**: Training will be offered to individual restaurants that have specific needs.
- **Training of Trainers (TOT)**: This program will be directly supported by members who would provide space and resources for such training.
- Structured Training for Interns and New Employees: A training manual will be developed to facilitate training of interns and new employees. The manual will reflect the formal training modules adopted by hotels.

#### 3. Investment and Business Development

Through the Investment and Business Development program, the association will introduce the **JRA Info Center** that would answer inquiries from members and potential investors related to the Jordanian restaurant industry. The center, which is expected to be fully operational by the end of 2007, will develop a network of tourism investors, provide members with information about available investment opportunities and help investors identify strategic partners and funding opportunities for their ventures.

#### 4. Membership Development and Outreach

This program will ensure member satisfaction through new valueadded menu of services and benefits. It also suggests the introduction of new member categories targeting unclassified restaurants as well as restaurants and cafeterias located in hotels and hospitals. The membership expansion plan, which will be based on a voluntary membership system, will help JRA assess its future readiness to be transformed into a voluntary association.

#### JRA Service Menu

- *Membership Directory*: To include details on JRA members (menus, contact details, etc.)
- *Membership privilege card*: To offer privileges and special discounts at outlets in Jordan and elsewhere.
- Health Insurance Program
- *Third Party Insurance*: To provide a group rate for property/casualty insurance for restaurants.
- *Advertising through JRA website*: Each restaurant member will have a page on the website
- "Silver Spoon" Award: A new award scheme to acknowledge successful establishments that have been operating in line with international standards. The "Silver Spoon Award" will be offered annually to members based on specific criteria.
- Seal of Approval: To award every restaurant registered with the association a "JRA Certificate" or "Seal of Approval."

#### 5. Finance and Administration

This program will be responsible for the association's operations (financial and human resource management). The CEO will work on developing a comprehensive Human Resources System to facilitate recruitment, staff orientation as well as evaluation of staff performance and training needs. Staff training will be conducted annually during JRA staff and board retreats.

# 2. Vision, Mission ,Objectives & Guiding Principles

## VISION

The restaurant and food service industry - a powerful and regionally competitive sector that contributes to the growth of the Jordanian tourism economy

## MISSION

JRA is a not-for-profit business association that aims at advocating and representing the needs of its members and creating a healthy business environment for the restaurant industry

## **OBJECTIVES**

- Represent members in public advocacy and ensure a customer-friendly institutional and regulatory framework for restaurants.
- Enhance product development and promote skilled human resources.
- Expand JRA business development services to provide professional networking, matchmaking and research services.
- Strengthen outreach to engage members, respond to their needs and expand membership base to include unclassified restaurants and supporting industries.
- Work towards transforming JRA into a voluntary association with excellent operations, management practices and corporate governance.

## **GUIDING PRINCIPLES**

- Public-Private Partnership
- Private-Private Partnership
- Community Outreach
- Increased Involvement of Members
- Increased Involvement of Women
- Promote International Best Practices and Standards

## 3. Organizational Development

JRA is a Mandatory business association with an elected Board of Directors and a hired staff. The organizational structure of the organization is therefore divided into two parts, a Board structure and an executive structure as described below:

## 3.1 BOARD OF DIRECTORS STRUCTURE, DUTIES & CAPACITY BUILDING

A nine-member Board of Directors elected every three years by the General Assembly governs JRA. Officers within the Board are as follows: Chair, vice chair, treasurer, secretary and five regular members. Board Members cannot serve more than two-consecutive terms in any capacity to ensure diversity and fresh thinking.

- The President and three other BOD seats come from three five star restaurants.
- Three BOD seats come from one two star restaurants and cafeterias.
- One BOD seat is chosen from night club members.
- One BOD seat represents other JRA interests such as theme parks.

#### Current duties of the Board of Directors according to the by-laws are:

- Manage the Association's administrative and financial affairs, including appointing the necessary employees, pursuant to the regulations it [Board of Directors] sets.
- Issue the regulations related to appointing the employees, determining their financial rights and taking punitive actions against them.
- Form appropriate committees and carry out their functions.
- Prepare the annual report and final accounts for the outgoing year; present estimated budget for the following year to the General Assembly.
- Look into any disputes or complaints that may rise between members, or between the members and other parties, and take necessary measures.
- Enter into affiliations, as appropriate, with other tourist related associations.
- Follow-up with collecting the subscription fees from the members.
- Take decisions on paying amounts due to any other parties, especially international associations.
- Deal with any professional related issues.

The Board of Directors meets at least once a month via an invitation by the Chairman or, in case of his absence, by the Vice Chairman. The meeting is considered legal if it is attended by at least its majority, provided that the Chairman or the Vice Chairman is present. The Board of Directors takes its decisions by majority (at least 5 votes).

The Board has been urged to explore means to generate non-dues income to expand services offered by the association and ensure sustainability of its programs.

#### Capacity Building Process

The new board members will be presented with a Board Manual that includes:

- By-Laws
- Board responsibilities and job descriptions
- Division of responsibilities of board and staff
- Financials for previous years and to-date
- Annual reports of previous years
- Plan for current and upcoming year
- Budget for current and upcoming year
- All minutes of past board meetings
- Updated members' list

Incoming Board Members will take part in several orientation sessions and meetings with:

- Outgoing board members
- JRA CEO
- Heads and members of JRA Committees
- Executive Staff

Board training is essential in ensuring a successful governance of the association. This is an area where JRA requires assistance to ensure professional and relevant training for its board on issues specific to JRA's areas of interest such as on general corporate governance issues common to all board members of associations.

These issues include:

- Public Policy Advocacy
- Best Practices in Corporate Governance for Business Associations
- The role of the Board in Business Associations
- Association Management

This will be implemented during annual board and staff retreats. JRA will identify an expert in association management who would conduct a one-

day training session for new Board Members who need guidance as they prepare themselves to assume responsibilities within the JRA Board.

## **3.2 COMMITTEES – ACTIVE ROLE**

The Board Executive Committee and the CEO will be responsible for conducting regular assessment of JRA's organizational structure to guarantee a smooth and sustainable implementation of strategies. This effort will ensure that staff growth is managed successfully and smoothly and supports the organization's development in terms of its programs and services.

#### Membership Committees

JRA must devise incentives to encourage membership to assume a greater role in the work of the association. Such incentives might include providing members with the opportunity to represent JRA in conventions and trade fairs. It is therefore recommended that JRA forms four new committees whose responsibility would be to assist JRA executive staff in implementing the strategies set forth by the association.

Each committee will be headed by a member and consist of general members. The work of the committee will be coordinated by a department/department manager. The four proposed committees are:

- Public Policy Advocacy and communications Committee
- Business Development Committee
- Training and Career Development Committee
- Membership Development and Outreach Committee

Each member responsible for a committee will be expected to report on progress achieved by his/her committee during monthly board meetings.

#### Ad-Hoc Committees

Ad-Hoc Committees stem from specific needs that arise. They consist of general and board members and are headed by general members. For example, an ad-hoc committee can be formed to implement specific programs and activities such as the Silver Spoon Award. (Details on this award are mentioned in the Membership Development and Outreach Section below).

## **3.3 EXECUTIVE TEAM – NEW STRUCTURE**

JRA has recently identified a CEO who will be responsible to recruit staff and manage the full operations of the organization. The CEO will report on progress to the board during a monthly board meeting and will interact, almost on a daily basis, with the Chairman of the board. As part of the association's Strategic Plan 2007-2009, it is suggested that JRA amend its structure to operate through four proactive departments.

The below departments will be responsible for the development and implementation of programs based on clear objectives and strategies:

- Government Advocacy and Communications Department
- Career Development and Skilled Human Resources Department
- Investment and Business Development Department
- Membership Development and Outreach Department
- Finance and Administration Department

The association is however, faced with an organizational challenge that does not support a smooth and professional implementation of programs and services under the above-mentioned departments.

Currently, JRA has four full time employees and one part time employee. Clearly, the current structure places more emphasis on the administrative aspect of the association's work, and does not support the new proactive approach that JRA wishes to adopt as part of this strategic plan.

A new executive structure that supports the implementation of the association's mission is therefore recommended. The Staffing Plan highlights the recommended changes in more detail.

#### Proposed Structure

A new Chairman has brought new life to the organization and is open to change. As a small organization, the JRA's CEO and other employees will each need to handle multiple duties. Given that form should follow function, it is recommended that JRA's staff responsibilities, moving forward, revolve around each of the four strategic departments proposed above as follows:

**CEO:** The CEO would be responsible for managing all departments and multiple member-led committees and will effectively implement the mission and the goals of the JRA. He/she would also be responsible for all financial, human resource and administrative matters of the association. The CEO would report to the association's Board of Directors concerning the development of annual operating budgets and programs of work.

**Head of Government Advocacy and Communications Department**: Responsible for JRA's advocacy activities. Head of this department would work with the Public Policy Advocacy Committee to promote JRA's positions with respect to elected officials and regulatory agencies. Responsibilities also include policy positions, including membership publications and communications.

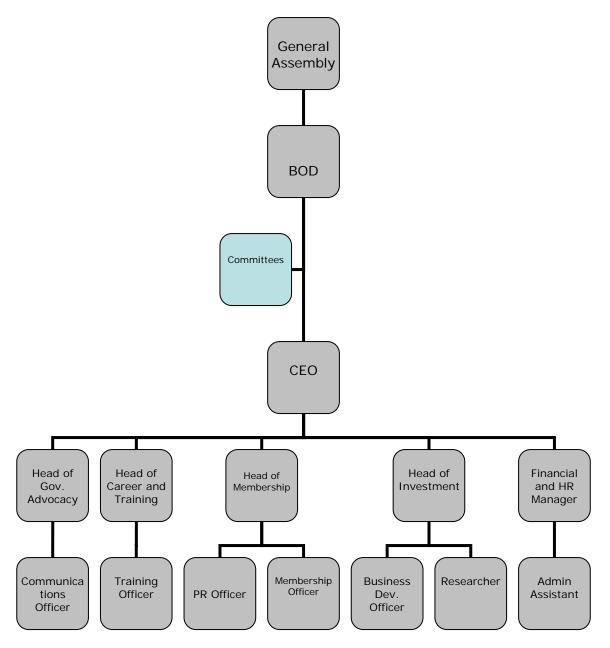

**Head of Membership Development and Outreach Department:** This employee would cover member services and outreach. This proposed position would make sure to develop and expand the association's membership base through provision of value-added services for JRA members.

Head of Career Development and Skilled Human Resources Department: This position would be responsible for developing a comprehensive training program for JRA. Head of this department would assess members' training needs and conduct research to provide tailored training services for members.

**Head of Investment and Business Development Department:** Head of this department would be responsible for introducing a new function focused on assisting members and non members in their effort to start or expand their ventures.

**Administrative Assistant** – This employee would be responsible for assisting the CEO and heads of departments in the implementation of activities and programs.

**Financial and Human Resources Manager:** This employee would be responsible for all financial, human resource and administrative matters of the association.

## PROPOSED ORGANIZATIONAL STRUCTURE

## **OUTSOURCING – NEW PROGRAMS**

In its effort to implement special programs and activities that would require specific expertise, JRA would identify consultants who would assist the association's staff in carrying out some of their responsibilities. Such programs would include:

- **Monitoring and Evaluation System**: An M&E system would include mechanisms for monitoring and evaluation of JRA activities and programs in addition to internal evaluation mechanisms of staff performance.
- A JRA Award Scheme: As mentioned in the (Membership Development and Outreach Department), JRA aims at designing a new initiative that would acknowledge members' successes. This effort would require the assistance of a consultant specialized in designing award programs for business associations.
- JRA Newsletter: As mentioned in the (Membership Development and Outreach Department), JRA will launch a newsletter that would keep its members and other stakeholders in the tourism and food industry updated on the association's services and activities. A communications expert would work closely with the Head of Membership Development at JRA to produce a high quality quarterly newsletter.
- JRA Membership Directory: JRA would also work with a public relations firm to produce a high quality membership directory that includes details on the association's members (menus, contact details, address, etc).
- **Special guidebooks**: The Business Development Department would work on producing special information/guidebooks to include relevant information on the food service industry.

## CAPACITY BUILDING – JOB SPECIFIC TRAINING

JRA will work towards the development of its board and staff. It will provide them with the opportunity to receive special training to assist them in their own professional growth to be able to perform their work and serve the members in the most professional and effective manner. JRA board and staff would also have the opportunity to take part in training courses offered to members to improve their knowledge of the industry. Staff would also participate in training programs offered to Board Members during annual retreats to improve their knowledge of association management. JRA will utilize the annual appraisal system to assess the needs of its staff to overcome their weaknesses and build on their strengths. Once the training needs of JRA staff have been identified, training courses that are common to all or a large number of staff members will be conducted to benefit all employees collectively. This will be done possibly within the framework of retreats.

Job-specific training programs would include:

- Project Management
- Time Management
- Team Building
- Effective Communications
- Public Speaking
- Presentation Skills
- Strategic Management, Planning and Marketing
- Change Management
- Public Policy Advocacy

## 4. Strategic Management

JRA's executive leadership, headed by its CEO, is responsible for developing sound plans and implementation processes in line with the association's strategic direction that will take into consideration a thorough SWOT analysis. This effort, which will be carried out through a participatory strategic planning process, will ensure the successful development of the organization both functionally and institutionally.

The process will also take into consideration management of risk and potential crises, and ensure full and active participation of the board and members. A clear and measurable impact assessment and evaluation process and the successful management of staff and programs will be included as major departments of the association's plan.

## 4.1 SWOT ANALYSIS

Results of JRA's **SWOT** Analysis based on discussions between the association's board and expert consultants are:

#### Strengths

- Good ties with regional tourism organizations
- New, strong and committed leadership
- Open to change
- Very good relationship with the government
- Healthy work environment (staff, board and chairman)
- Large membership base

#### Weaknesses

- Mandatory membership makes the association dependent on enforced funding and less responsive to member needs
- Lack of awareness among members on JRA philosophy
- Members do not feel they receive sufficient value
- Not performing to potential for industry & their associations
- JRA is confused as yet another government agency
- Membership not supporting JRA beyond membership fees.
- Limited number of professional staff
- JRA does not operate through a clear strategic plan

#### **Opportunities**

- Large membership base can be used as an opportunity to engage more members as volunteers supporting the work of JRA
- Room to grow, strengthen and legitimize organization
- Availability of potential grant funding

- Potential efficiencies, economies of scale, and additional resources through alliances
- A National Tourism Strategy in place
- Expansion of JRA program to make it comparable to restaurant associations internationally
- Anticipated sector growth
- Detailed three-year operational plan will ensure deliverables and enhance credibility with members and stakeholders

#### Threats

- Lack of interest among Jordanians in service-related jobs especially in the restaurant industry
- Lack of skilled workforce
- Restrictive government regulations
- Diversity of JRA membership can challenge a unified voice
- Regional instability
- economic challenges VAT/service charge costs

## **4.2 STRATEGIC PLANNING PROCESS**

JRA's three-year strategic planning process is an effort that should involve the JRA membership, previous and current boards of directors, JRA executive staff and key stakeholders.

During an annual staff and board retreat, the CEO and his/her team will engage in strategic brainstorm sessions aimed at evaluating the association's strategic direction. The JRA team (CEO and executive staff) will develop an amended strategic plan following a thorough review of the progress achieved by the association and the challenges encountered throughout the implementation of the plan. The final plan will be presented to the JRA board for review and approval. This is then presented to members at the association's annual General Assembly meeting to get their feedback and approval. Such a presentation is extremely essential to engage members as active participants in working groups and ad-hoc committees. Members' input will be incorporated and the plan further developed.

During this session, an updated SWOT analysis will be conducted and included in the plan. Improvements and developments within the organization, both institutionally and in terms of programs will be further expanded to cover the weaknesses identified and to account for the threats that exist. Strengths and opportunities will be further built upon through the various parts of the plan.

Each department will then be asked to further develop the operational section of their individual plans by producing detailed Standard Operating Procedures and checklists for each single JRA activity, event and service.

## **4.3 RISK MANAGEMENT**

JRA operates as part of a very competitive and vigorous tourism sector, which aims at doubling its economy by 2010 through an ambitious strategy. Several stakeholders from the private sector, public sector and civil society will be involved in the implementation of this strategy through different programs and activities that might complement JRA's efforts or compete with some of its initiatives. Therefore, JRA might be faced with several challenges that may affect its ability to conduct its programs and activities in accordance with the plan. It is very important for the association to identify the potential risks that may arise before or during the implementation of initiatives.

Risk management will help JRA maintain a positive image and credibility among members and stakeholders. This section highlights mechanisms to avoid risks that may arise or future events that may hinder JRA's ability to accomplish its mission of maintaining its positive image and ability to serve its members.

#### Risk Management Process

When addressing risks, the following steps will be taken into consideration:

- Identify Potential Risks
- Evaluate and Prioritize Risks

#### Develop a Risk Management Plan

A short risk management plan will be developed if a certain risk is expected. Each risk management plan should take into consideration the following:

- Competition/Media Coverage
- Human Resources
- Political Crises

## 4.4 MONITORING, EVALUATION AND IMPACT ASSESSMENT

JRA has not yet developed a mechanism for monitoring and evaluation. It currently relies on direct feedback from members who are involved in the different activities.

The association is aware of the importance of devising a formal monitoring and evaluation mechanism that will not only help assess the impact of its services, but will also determine the nature of future programs and initiatives. Monitoring and evaluation of JRA programs will be conducted through various means including:

- Surveys
- Evaluation forms
- Personal meetings with members and stakeholders
- Assessment retreats with members and stakeholders

This effort requires the assistance of a professional consultant who would help JRA in developing a formal monitoring and evaluation system to be used by all departments to measure their performance and, by management, to predict the need for change and enhancement of activities and services.

This will be implemented as follows:

- Hire a consultant to design an impact and evaluation system
- Implement a formal monitoring and evaluation and impact assessment system (database)
- Training staff on system
- Implement the impact and evaluation system

# **5. TECHNICAL PLAN**

This section highlights JRA's plan to achieve its mission and objectives. It describes in detail the association's programs and activities that will be implemented during the upcoming three years through its five departments and supporting committees and working groups.

Each department will be responsible for achieving an objective as follows:

#### **Government Advocacy and Communications Department**

Objective: Represent members in public advocacy and ensure a customerfriendly institutional and regulatory framework for restaurants

#### **Career Development and Skilled Human Resources Department**

Objective: Enhance product development and promote skilled human resources

#### **Investment and Business Development Department**

Objective: Expand JRA business development services to provide professional networking, matchmaking and research services

#### Membership Development and Outreach Department

Objective: Strengthen outreach to engage members, respond to their needs and expand membership base to include unclassified restaurants and supporting industries

#### **Finance and Administration Department**

Objective: Work towards transforming JRA into a voluntary association with excellent operations, management practices and corporate governance.

## **5.1 Government Advocacy and Communications**

# Objective: Represent members in public advocacy and ensure a customer-friendly institutional and regulatory framework for restaurants

## INTRODUCTION - POLICY ADVOCACY

Since its inception, JRA has been successful in establishing a good relationship with several governmental institutions and was able to respond to members' needs and address challenges faced by restaurants on a regular basis. The association aims at expanding this service and adopting a more proactive approach that addresses specific challenges faced by members especially those related to legislation that regulate the work of restaurants.

The association has produced several policy papers and is in contact with relevant governmental bodies for follow up. The three papers that have been developed and are still in process include:

- The Investment Law so that it includes the restaurant sector and obtain appropriate customs exemptions to improve services in the tourist restaurants.
- Health and Safety Regulations
- Tourism legislation and restaurant classification principles in cooperation with the SIYAHA project and NTS

## SUPPORTING THE NATIONAL TOURISM STRATEGY

Through the Government Advocacy and Communications Department, JRA will be an active partner in the implementation of pillar four of the National Tourism Strategy that focuses on conducting a holistic review of Jordan's legislative and regulatory environment pertaining to tourism sector development. It also calls for reforms that ensure a highly efficient legal environment, clear mandates, an empowered role for the private sector, and favorable investment conditions capable of attracting both domestic and foreign investors.

JRA is also expected to support the implementation of several programs highlighted in pillars two and three.

The following are six action items mentioned in the National Tourism Strategy that require the support of this department at JRA.

- Include restaurants of certain threshold to investment promotion exemptions. (JRA is required to champion this task)
- Support revision of system of classification for restaurants and other classifiable tourist service-provider establishments.

- Revisit licensing qualification standards for all tourism service providers
- Lift restrictions of alcohol sale in 1-2 star restaurant establishments.
- Introduce incentives such as tax exemptions and long term loans to encourage development of outlets with adequate food and beverage quality
- Support minimum standards for pay and conditions for workers and restaurants.

## DEPARTMENT OBJECTIVES

This Department will work to achieve the following objectives:

- Conduct regular research on relevant policy issues and solicit a list of advocacy issues critical to the industry
- Form active coalitions with stakeholders to identify and address policy issues critical to the industry
- Educate members and relevant governmental institutions on legal requirements, standards and conditions
- Establish and maintain a good relationship with public sector organizations.
- Establish and maintain a good relationship with the media to effectively communicate policy issues that influence the restaurant industry.

It is worth noting that effective communication is very critical to the success of this department. It is therefore suggested including communications as a sub-function focusing on producing strategic messages that articulate the position of JRA through the media, JRA website and other communications tools.

Throughout the upcoming three years, JRA will build its public policy capacity through the following programs:

## **PROGRAMS AND ACTIVITIES**

#### 1. Establish an effective Government Advocacy and Communications Department

In order to create an effective public policy program, JRA will identify members who are interested in serving as part of a committee to advocate policies on behalf of JRA. Members, who should serve in this committee should have experience in key issues faced by JRA and those who have personal connections with policy-makers. The structure of the committee will be as follows:

- Chairperson (Board Member)
- Interested member(s) of the Board
- Interested JRA members
- JRA's CEO
- JRA's Head of the Public Policy Advocacy Department
- Outside consultants (when necessary)
- Members or executives of other relevant business associations (when necessary)

The department will work closely with a consultant to conduct training for members of the PPA Working Group. The training will focus on necessary steps that should be taken to implement an advocacy program.

The department, with the help of the public policy advocacy working group, will create a public policy advocacy manual to include operating procedures necessary for facilitating the communication of JRA's position towards any policy issue. The manual will include the following departments:

#### 2. Policy Research

JRA will conduct extensive research on all relevant policy issues influencing the restaurant industry. Such policies include tourism and investment legislation and other legislation critical to the success of restaurants in Jordan.

Research will be primarily based on the specific challenges faced by members and on the direct feedback JRA receives from restaurants through annual needs assessment sessions and surveys.

The department will also make sure to track changes in legislation affecting the tourism industry. Any changes and/or amendments will be communicated to members regularly.

#### 3. Strategic Coalitions

JRA will work towards forming active coalitions internally and externally to advocate policy issues affecting the restaurant industry. Through an internal Public Policy Advocacy committee, department staff will empower members to represent the association in advocating policy issues. This committee will then identify and empower strategic allies from the government as well as other stakeholders who share similar challenges and have a stake in legislative changes influencing the tourism industry as a whole. The committee will conduct annual needs assessment surveys and sessions that would help JRA focus on priority issues affecting the industry.

#### 4. Policy Papers – Advocacy Program

Once policy priorities are identified, the association would develop policy papers that clarify JRA members' position on critical issues. Members' position will be communicated to policy makers through strategic coalitions and the media.

It is worth mentioning the below policy issues identified by the association as policy priorities that need to be addressed:

#### Abolition of Security Committee

One of the major challenges encountered by restaurant owners is the Security Committee that carries out surprise inspection visits during night time. Members do not see a need for such a committee as long as there is another **Joint Inspection Committee** that carries out inspections on a regular basis.

#### Night Clubs

This category of membership is the most that needs continuous attention from JRA. Complaints from Night Club owners have been very frequent and members feel that this "preoccupation" has influenced the association's ability to offer meaningful services for its members. It was therefore recommended removing this category from JRA membership structure to give the association space to focus on the real needs of members.

#### 5. Communications and Media Relations

As mentioned above, this function is extremely important in ensuring the success of the association's policy efforts. The committee and JRA leadership will communicate JRA messages through:

#### JRA Spokesperson

JRA Chairman will act as the association spokesperson to communicate members' positions publicly through regular interviews and/or press conferences. In the case of the Chairman's absence, the CEO will take over.

#### Media Relations

JRA will build and maintain a good relationship with members of the media who would be contacted regularly to cover the association's activities.

#### Media Roundtable Discussions

A roundtable with the media will be organized annually followed by a press conference on the association's position on issues.

#### Annual Media Iftar

In its effort to maintain a credible relationship with the media, JRA will invite members of the media to an iftar annually. Such interaction is necessary to keep the media informed on the association's activities and position on issues. It is important for JRA spokespersons to attend all media-related activities.

#### Other Communications Tools

JRA strategic position and messages will also be articulated through the traditional communications tools such as the JRA website, newsletter and press releases. *(Refer to Membership and Outreach Department)* 

#### 6. Education and Awareness

JRA will build on its effort to educate members, policy and lawmakers on the rules, regulations and requirements that restaurants should abide by.

The association has prepared a draft of a **Condition and Standard Manual** that clarifies all such requirements in cooperation with Ministry of Tourism. The manual is expected to be published and distributed by the end of September 2006.

In cooperation with the Membership Development and Public Relations Department, annual roundtable sessions will also be conducted to educate members on critical policy issues affecting their industry as follows:

#### Safe Food Handling Campaign

Food handling is a very important part in the overall tourism process and a key tourism product that plays a key role in attracting tourism. JRA will develop a plan of action for the implementation of a comprehensive campaign that would ensure the adoption of best practices and industry standards when handling food in tourist outlets, hotels, restaurants and training facilities. The campaign will be developed in cooperation with Siyaha Project.

#### Roundtable - JRA Policy Papers

Once a JRA policy paper is developed, members will be invited to a roundtable discussion to review the paper and give feedback. This annual meeting is essential for members' by-in and support. Such meetings will also give JRA leadership and staff the opportunity to keep members' engaged, informed and most importantly reminded of the association's value-added and impact.

#### Roundtable – General Policy Issues

JRA will organize roundtable discussions quarterly with policymakers from the tourism industry and other stakeholders to educate members on developments related to tourism and other sectors affecting their industry. Such roundtables will not only provide members with the opportunity to stay updated on important developments, they will also give them a chance to interact with policy-makers and share each other's experiences and challenges.

#### 7. Charter of Business Rights

On the long term, JRA will work with all relevant stakeholders from the tourism industry to develop a Charter of Business Rights that clarifies the rights of investors wishing to contribute to the growth of the industry. A focus group will be formed to develop a policy paper that would suggest a mechanism to identify, articulate and generate government support of such a charter.

*Note: All activities to be implemented by this department should ensure the effective participation of women.*

## 5.2 Career Development and Skilled Human Resources

## Objective: Enhance product development and promote skilled human resources

## INTRODUCTION - A MAJOR SERVICE

JRA is aware of the importance of providing training as a major service for its 529 members with a workforce of a total of 9008 employees. Several training courses have been offered to members throughout the past few years. A few of them were conducted in response to members' needs. But the significant number of restaurant industry employees calls for a well-developed training program that is based on the specific needs of members and the industry as a whole.

All members who have been interviewed as part of the development of this document expressed a dire need for training programs targeted towards developing the skills of their employees. Some members expressed willingness to cover the cost of training.

According to a Manpower and Training Needs Survey conducted by Siyaha Project in August 2006, the restaurant and fast food restaurant sectors have shown significant growth in employment during the past few years accounting for 34 percent.

The survey revealed that over one-third (39%) of fast food restaurant operators intend to develop or expand their existing business in the coming year. Of these, 52% believe that their developments will result in a requirement for additional staffing. It is estimated that the level of expansion will range from 10 - 25%, resulting in approximately 2,285 (+10%) additional jobs being created. It is therefore estimated that by 2007/2008 the number of employees in the restaurant industry will reach 12,620 from 10,900 in 2006.

Restaurant owners with vacancies reported difficulty in recruiting welleducated staff to take a career in the restaurant sector. They attributed these difficulties to a number of factors including poor wage levels, antisocial hours and lack of available education and training opportunities.

The survey also revealed a low awareness in the restaurant industry of formal education and training programs offered by institutions despite an estimated 150% increase in the number of restaurants since 2003.

It also stated that the industry's reaction to graduates of colleges and vocational training centers indicates a need to create awareness and appreciation of respective roles in formal training and professionalism in

the tourism industry. The survey identified training needs by sectors of the tourism industry. Following are the training needs of the restaurant industry:

- Basic computer skills for managers and supervisors
- Communication techniques
- Computer and internet update training (for owners and management)
- Computer skills for management
- Customer/guest care
- Financial management for restaurants
- Fire/safety and security
- Human resource training (motivating personnel, leadership, staff appraisal skills)
- Hygiene and food safety standards
- Interpersonal skills
- Managing a restaurant business
- Menu design and planning
- Promotion and sales techniques
- Supervisory management skills
- Technical skills food and beverage service skills (for service staff)
- Technical skills food production for chefs
- Tourism industry awareness
- Train-the-trainer programs
- Wines and cocktails

Additionally, managers of fast food restaurants expressed concerns regarding the weak level of the basic skills of new entrants to the fast food sector and the potential for improvement of current staff. All expressed the need for vocational level training in basic food and beverage production and service skills, basic English language, social skills and self esteem skills.

## SUPPORTING THE NATIONAL TOURISM STRATEGY

Through the Career Development and Skilled Human Resources Department, JRA will use and build on the above-mentioned findings of the survey in its effort to develop a professional training program for its members. It will also act as an active partner in the implementation of pillar 3 of the National Tourism Strategy that focuses on creating a pool of highly skilled human resources able to meet the requirements of the tourism industry.

The NTS identified four tasks that require the support of JRA as follows:

- Upgrade standard of service in establishments
- Cultural events: Introduce a cultural heritage award program to incentives achievement of high management standards, innovative activities and to meet the goals of NTS.
- Develop a quality employer program to include benefits, corporate culture, career plans and in-country training.
- Take immediate necessary corrective measures for complete rehabilitation and for qualified and effective management of these sites camping and rest house facilities and new sites.

## **DEPARTMENT OBJECTIVES**

Based on the above, this Department will work to achieve the following objectives:

- Establish a network of specialized trainers from Jordan and internationally.
- Establish a formal relationship with local, regional and international organizations that provide specialized training programs for employees in the hospitality sector
- Provide specialized training programs based on the specific needs of JRA members
- Conduct Training of Trainers (TOT) program in cooperation with JRA members
- Develop structured training programs for interns and restaurant employees

## **PROGRAMS AND ACTIVITIES**

Throughout the upcoming three years, JRA will build its training capacity through the following programs:

#### 1. Building Networks

JRA will conduct extensive research aimed at identifying a pool of training specialists in Jordan and abroad. It will study the possibility of signing agreements with specialists who would be available to conduct training for the association on an annual basis.

Department staff will also identify organizations that offer specialized training and nominate members to participate in such programs locally and internationally. Jordan hosts several international initiatives and programs that provide training for entrepreneurs wishing to start their own businesses. The Empretec Program, currently coordinated by the Jordan Loan Guarantee Corporation, is one of the programs that have proved successful in Jordan. JRA will provide its members with the opportunity to benefit from such training at discounted rates.

JRA will ensure that members have access to its network of training specialists and partner organizations.

## 2. Needs Assessment

With the help of an internal Training and Capacity Building Committee, JRA will conduct annual needs assessment surveys and sessions with the aim of identifying members' training requirements. This exercise will be carried out at the beginning of each year to prepare a comprehensive training program for the following year.

## 3. JRA Training Programs

In line with specific needs of members, JRA will develop a comprehensive training program in line with international best practices and one that takes into consideration all categories and classifications. Based on JRA's guiding principle that ensures community outreach, the training program will take into consideration requirements of restaurants in all areas of the Kingdom. Twice a year, training will be offered in two different governorates.

JRA training program will be structured as follows:

- General Training

One to two-day training courses will be offered in Amman to cover areas such as integrated cost control, catering, leadership in hospitality, food safety, hygiene, finance, etc. - Tailored Training

Tailored training programs will be offered to individual restaurants that have specific needs and wish to benefit from JRA training services at an agreed cost. JRA would identify specialized trainers and discuss content and cost on behalf of members.

- Training of Trainers (TOT)

In cooperation with specialists, JRA will develop a Training of Trainers program with the aim of ensuring sustainability of training offered. This effort will be directly supported by members who would volunteer to provide space in their restaurants for such training, and resources such as waiters and chefs to share their experiences with trainees.

- Structured Training for Interns and New Employees The need for a structured training program was articulated by some members who feel that their new employees are not exposed to proper training when they first start. JRA will therefore explore the possibility of developing a manual that reflects the formal training modules adopted by hotels. This manual will be distributed to all members.

#### 4. Employee Certification and Track Record

One of the major challenges faced by restaurants is identifying skilled human resources. JRA will develop an internal program to train employees in the hospitality sector before they apply for restaurant jobs. Employees would receive a training certificate from JRA that would qualify them to apply in restaurants.

Certified employees would report back to JRA every time they leave a job so that the association can have a record of the employee's professional history. This information should be made available to members who may wish to check the employees' credibility and track record before recruiting them.

Note: All activities to be implemented by this department should ensure effective participation of women.

# 5.3 Investment and Business Development

# Objective: Expand JRA business development services to provide professional networking, matchmaking and research services

# **INTRODUCTION - JRA INFO CENTER**

Jordan has embarked on a very ambitious strategy for the development of its tourism industry – the country's largest export sector and second largest employer. By 2010, Jordan aims at doubling its tourism economy through an integrated, value chain approach involving government facilitation and investment in partnership with the private sector.

The association is aware that its effort to engage in business development will be challenging but yet very timely and one that will reflect positively on its local positioning, image and credibility among existing members and private investors. This department will be developed to become the driving force behind JRA's success as a proactive and service-oriented association for members and potential investors.

Currently there is little information about Jordan's restaurant industry in terms of quality and contribution to the economy. This department will work closely with relevant government bodies and research firms to collect and document information necessary for helping investors and members in their effort to start or expand their restaurant businesses in Jordan.

Through the Investment and Business Development Department, which will be transformed into the **JRA Info Center** by the end of 2007, the association will ultimately aim at becoming a one-stop-shop for investors, offering services that range from providing information about the industry, to helping investors secure strategic partners and funding for their ventures. This new initiative will not only enhance the association's credibility in the tourism industry, it will also generate revenue for JRA through specialized advisory services mentioned below.

# SUPPORTING THE NATIONAL TOURISM STRATEGY

JRA's strategy for the coming three years takes into consideration the importance for the association to contribute to the implementation of the National Tourism Strategy, specifically in its effort to encourage and facilitate private investments in the restaurant industry.

According to a Manpower and Training Needs Survey conducted by Siyaha Project in August 2006, 30% of restaurant owners intend to develop or expand their existing business in the year 2006-07. All of

these will need extra staff. It is also estimated that approximately 1030 additional jobs will be created through the planned business development in the sector, mainly driven by the expansion of the fast food restaurant sector. About 60% of restaurants plan to change the type of service they provide.

The Investment and Business Development Department will study the findings of the above-mentioned survey as it develops this new department. It will also act as an active partner in the implementation of the National Tourism Strategy that identified seven key tasks that require the support of JRA as follows:

- Create stand alone theme restaurants. Create incentives for local investors in all regions (except Amman) to invest in stand alone theme restaurants. (JRA is expected to champion this task).
- Assist through provision of micro-finance to ensure adherence to safety, hygiene, and public health measures.
- Develop project profiles to encourage and create country-wide resorts reflective of geographic zones and themes. (e.g. desert retreats, mountain lodges).
- Identify locations for panoramic views for food and beverage outlets and determine viability.
- Maintain brochure racks with tourism info in all establishments.
- Create career opportunities for expatriate workers.

# DEPARTMENT OBJECTIVES

- Conduct regular research on developments in the tourism industry in general and the restaurant industry in particular. Make research papers available to members and potential investors.
- Help investors identify strategic partners for their businesses
- Establish a relationship with stakeholders in the tourism industry to identify opportunities for investments in line with the tourism development effort. (e.g. Romero – Um Qais, Haret Jdoudna -Madaba)
- Assist investors in developing business plans in cooperation with existing programs in the Ministry of Planning such as Irada.
- Answer inquiries about investment in the restaurant industry. Provide information for potential investors related to registering and licensing their ventures.
- Establish a relationship with banking and financial institutions to help investors secure funding for their ventures.
- Establish a library that periodical and magazines about the industry

#### Important Note:

A similar structure was developed by EJADA (Euro-Jordanian Action for the Development of Enterprise) in 2001. The European Information Correspondence Center (EICC) acts as a one-stop-shop service center for Jordanian and European investors. It provides a myriad of services including inquiries, partner search, advisory and bridging services. JRA could learn from the EICC experience as it develops a structure for its information center.

## **PROGRAMS AND ACTIVITIES**

Due to the complexity and diversity of services to be offered by this new department, it will be developed in three phases as follows:

#### PHASE ONE: Set-Up (Timeline 1 year)

#### 1. Research – Set Up

#### Capacity Building

During the first year, the JRA will work on building the capacity of its staff to be responsible for setting up the JRA Info Center. This includes learning from other experiences such as the EICC mentioned above, conducting research on similar structures internationally and forming an internal committee of members who will be willing to assist the association in this effort

#### <u>Systems – Databases</u>

JRA will develop a data base of all necessary information on the industry. Such information would include relevant legislation, business statistics, international best practices, potential investors in the tourism industry, etc.

#### <u>Networks</u>

During the first year, the association will build a network on two different levels:

**Locally**, it will compile a list of investors in the tourism industry in addition to potential investors who would likely approach JRA for assistance.

**Regionally and internationally**, it will study the possibility of joining other restaurant associations to learn from their experiences and have access to their network of investors. Such associations could include the International Hotel and Restaurant Association.

#### PHASE TWO: Service Delivery (Timeline 1 year)

#### 1. Information and Inquiries

The JRA Info Center will answer inquiries from members and potential investors in the restaurant industry. This function will require extensive research on all tourism-related legislation in general, as well as rules and regulations related to the restaurant industry in particular. JRA will be equipped to answer all inquiries ranging from registering a restaurant in Jordan to identifying potential business partners.

#### 2. Networking and Matchmaking

As part of its efforts to encourage more investment in the restaurant industry, estimated to date at JD200 million, JRA will develop a network of tourism investors and provide members with information about the available investment opportunities. JRA will also conduct partner searches for members wishing to start their restaurant businesses but need financial support through strategic partnerships.

#### **PHASE THREE:** Expansion of Services (Timeline 1 year)

#### 1. Funding and Business Planning

JRA will establish a relationship with banking and financial institutions to help investors secure funding for their ventures. It will study the possibility of signing agreements with financial institutions that would provide financial facilities for investors in the tourism industry. It will also conduct research on national initiatives that provide assistance in business and financial planning.

#### 2. Publications (JRA Library)

The JRA Info Center will develop a database of information on the tourism sector, and investment opportunities in the tourism and restaurant industry in Jordan. It will also work towards publishing handbooks/booklets on licensing, registration, international best practices, starting a restaurant business, etc.

#### 3. Consulting Services

During the third year, JRA will start providing specialized consulting services for members and potential investors in the restaurant industry. Such services would include:

#### Statistics/Advice on Location of New Branches

Some members who wish to establish new branches for their restaurants expressed the need for JRA to conduct research and provide statistics on suitable locations or "high traffic areas" as one member described them.

#### Franchise Consulting

Members also mentioned the need for assistance as they explore the possibility of franchising their restaurants. Some of them were contacted by regional investors interested to buy a Jordanian franchise but the lack of experience in the field hindered such an effort. One member suggested identifying specialized consultants who would work with members on transforming their restaurants into international franchises. This can be a service offered annually to interested members by the JRA Info Center. Members who wish to benefit from such a service would cover the cost of the consultant.

#### 4. Theme Restaurants

In a meeting with Members of the Board the idea of exploring the possibility for JRA to create theme restaurants outside Amman was discussed. This is in line with the JRA-specific task articulated in the National Tourism Strategy as mentioned above. The Board agreed to study the feasibility of JRA ownership of theme restaurants for a period of three years with the aim of generating revenue for the association. JRA would then transfer ownership to investors in a fair bidding process.

# **5.4 Membership Development and Outreach**

# Objective: Strengthen outreach to engage members, respond to their needs and expand membership base to include unclassified restaurants and supporting industries

### INTRODUCTION - A MEMBERSHIP-DRIVEN ASSOCIATION

As mentioned earlier, Jordan is witnessing a significant growth in the restaurant industry. The mandatory membership structure at JRA has caused the association to be less responsive to the specific requirements of members.

Members who have been interviewed for the purpose of this strategic plan said they expect more from their association that has so far demonstrated a reactive approach as opposed to a more dynamic proactive approach dedicated to providing services and spearheading initiatives that are in line with members' specific needs.

The membership is made up of approximately 529 "classified Tourist" restaurants categorized from One to Five Stars so designated by a combination of government officials and JRA staff. At one point in their brief history, the 9,000 or so "unclassified" eating establishments were also included in the organization, but the difficulty of guaranteeing quality caused these to be split off to a separate structure.

The restaurant industry itself is expanding in both numbers and quality. The following table shows the increase in total number of members registered at JRA since 2003.

Year	2003	2004	2005	2006
Total Number				
of	397	457	486	529
Restaurants				
% increase	-	15%	6%	9%

Restaurant fees to JRA are contingent on their star rating, with higher rated restaurants (more stars) paying increased membership fees. The table below lists the membership fees in Jordanian dinars for each level:

	5 s	tar	4 s	tar	3 s	tar	2 9	star	1 s	tar
	F	Α	F	Α	F	Α	F	Α	F	Α

F: First time fee in JD / A: Annual subscription fee in JD

# MEMBERSHIP SATISFACTION PLAN

Unlike voluntary business associations, JRA is not required to devise a membership retention plan that would guarantee a flow of income through membership dues. It is however required to develop a "Membership Satisfaction" plan that would ensure increased member satisfaction through benefits and value-added services. It was also suggested by Siyaha Project that JRA explores the possibility of expanding its membership structure through inviting other potential members to join the association voluntarily. This effort would encourage the association to continue to focus on providing high quality services and programs.

# DEPARTMENT OBJECTIVES

Based on the above, this Department will work to achieve the following objectives:

- Expand JRA's membership structure to include unclassified restaurants and other restaurants located in hotels and hospitals.
- Introduce new services, activities and benefits that provide members with additional value-added to their membership with the aim of ultimately transforming JRA into a voluntary association.
- Acknowledge members' successes through an annual award program.
- Provide members with the opportunity to engage in networking activities to learn from each other's experiences.

• Increase JRA's outreach through a comprehensive outreach strategy that aims to improve the association's image and credibility among members and the general community.

# **PROGRAMS AND ACTIVITIES**

Because of the diversity of programs and services offered by this department, it will be divided into two sections: Section 1: Membership Development. Section 2: Outreach.

Throughout the upcoming three years, JRA will work to implement the following programs:

## SECTION 1: MEMBERSHIP DEVELOPMENT

#### 1. Expansion of Membership Structure

Since JRA is a mandatory association that guarantees an annual flow of income from membership dues, it is recommended that the Board of Directors studies the possibility of expanding the current structure by introducing new membership categories that would include unclassified restaurants. This effort would require revising the association's by-laws and including a new article that would allow JRA to approach unclassified restaurants as voluntary members.

Head of Membership Development and Outreach Department would be responsible for conducting comprehensive market research to determine the size of JRA's potential membership base.

A new membership structure would not only help generate more revenues for the association, it would also encourage JRA to continue to focus on providing quality services to members. New categories to be included in JRA membership structure would include:

- Unclassified Restaurants (currently there are about 9,000 unclassified restaurants in Jordan that are not registered with JRA.) Many of these restaurants share similar needs as classified restaurants registered with JRA, especially those that have more than one branch located in different cities around Jordan. Examples of such restaurants include (Abu Jbara, Kalha, Hashem and Dai'aa). These restaurants have a reputation for offering high quality traditional foods that attract many tourists. They can be treated as 1 and 2 classified members.

#### - Restaurants located inside hotels

Restaurants located inside hotels are also not registered as JRA members but have a great potential of benefiting from the association's training services especially that they care about providing high quality services to their clients – the majority of them tourists. These would include all restaurants located at five and four star hotels such as the Intercontinental, Grand Hyatt, Marriott, Radisson SAS, Four Seasons, Sheraton, Howard Johnson and many others. Most of these restaurants can be treated as 4 and 5 star classified members.

#### - Cafeterias located inside hospitals

Almost all hospitals in Jordan provide food services to visitors. One of the major concerns at such cafeterias is hygiene. Since these cafeterias do not have access to services offered by JRA, the association would visit them to assess their needs and invite them to become members.

Once by-laws are amended to allow JRA to approach unclassified restaurants as members, and once research is conducted to determine the size of the potential membership base, the JRA Board of Directors would meet to agree on membership fees for the new categories. Below is an anticipated number of new members to be recruited during the coming three years.

	ars			
Type of Restaurant	2007	2008	2009	Total
Unclassified traditional Restaurants	15	25	30	70
Hotel Restaurants	10	15	20	45
Hospital Cafeterias	3	5	8	16
TOTAL	28	45	58	131

The Proposed dues structure for the new categories of members is as follows:

Type of Restaurant	F	Α
Unclassified traditional	150	50
Restaurants		
Hotel Restaurants	300	100
Hospital Cafeterias	150	50

F: First time fee in JD / A: Annual subscription fee in JD

Important note: This dues structure is by no means final. It should be reviewed and agreed upon by the board of JRA. It however recommends similar membership fees paid by the different categories, while taking into consideration the fact that the above establishments are already registered with other bodies and may not have the willingness to spend significant amounts on membership fees.

A JRA Membership Officer will be responsible for recruiting these new categories of members through:

- Personal Calls

Membership Officer will conduct 10 calls a day to promote JRA among potential members and request personal appointments.

- Personal Visits:

Membership Officer will be responsible for conducting 10-15 visits a week where he/she would distribute JRA membership kit that would include the association's brochure, (services and benefits), newsletter, membership directory, information on committees and working groups.

<u>Invitations to JRA Activities:</u> As part of efforts to promote services of JRA, potential members will be invited to attend the association's activities for a limited period of time to get an idea of the nature of services they would receive if they decide to join.

#### 2. Membership Satisfaction/Impact Assessment

The Head of Membership Development and Outreach Department will use the Monitoring and Evaluation mechanism to assess impact of the association's programs and services.

As mentioned in the Monitoring and Evaluation section above, assessment of member satisfaction and JRA programs will be conducted through various means including:

- Surveys
- Evaluation forms
- Personal meetings with members and stakeholders
- Assessment retreats with members and stakeholders

Head of the Membership Development and Outreach Department and his/her team will conduct regular visits to members to establish personal contact with them, listen to their concerns and update the on the association's programs and services. Members' feedback will then be communicated to the rest of the departments for follow up.

#### 3. Benefits and Services

JRA will introduce new services and benefits with the aim of ensuring member satisfaction.

- Membership Directory

JRA would work with a public relations firm to produce a high quality membership directory that includes details on the association's members (menus, contact details, address, etc). This directory will be used as a tool to promote members publicly and among tourists. The directory will be distributed through all hotels, travel agencies and tour operators.

<u>Membership privilege card</u>

A member privilege card will be presented to all members offering them privileges and special discounts at outlets in Jordan and elsewhere. Offers are solicited from members themselves and from other service providers. The main objective is establishing networking amongst members themselves and providing them with special services and privileges that they deserve. The card also serves as the JRA membership card.

- Health Insurance Program

JRA currently offers health insurance to members, their employees and families. So far only 30 establishments with a total of 130 family members and employees are benefiting from this service. JRA will continue to promote this benefit among members. Commissions would be shared with the JRA.

- Third Party Insurance

JRA will conduct a feasibility study to provide a group rate for property/casualty insurance for the restaurants to protect patrons in the case of injury or illness and/or the restaurant property in case of fire or theft. Commissions would be shared with the JRA.

- Advertising through JRA website

Each restaurant member at JRA will have a page on the association's website with a picture of the restaurant, latest menu and contact details. Other stakeholders, tour operators and suppliers will have the opportunity to advertise through the JRA website at a set price.

Important Note: All the above-mentioned benefits can be sources of revenue for the association.

#### 4. Acknowledge members

- <u>"Silver Spoon" Award</u>

JRA will introduce a new award scheme to acknowledge successful establishments that have been operating in line with international standards. The "Silver Spoon Award" will be offered annually to members based on specific criteria. This effort would require the assistance of a consultant specialized in designing award programs for business associations.

- Seal of Approval

The JRA will start a country-wide initiative to award every restaurant registered with the association a "JRA Certificate" or "Seal of Approval." All restaurants wishing to obtain the certificate would have to apply for a thorough inspection through the joint inspection committee that would conduct several visits before the member would qualify for the certificate. JRA Board would have to agree on a mechanism for awarding a "Seal of Approval" with the joint inspection committee.

#### 5. Networking

In its effort to keep its members engaged and in touch with the association, JRA will organize two large activities annually.

- General Assembly Meeting

This activity should be held annually to present to members the association's budget and strategic plan. Through this activity, members will have the opportunity to communicate their needs and concerns, and give feedback on the association's services and programs. Once every three years, JRA members elect a new Board of Directors during the General Assembly Meeting.

- Annual Social Activity

Members will be invited to an annual networking activity that aims at providing them with a venue to network and meet new members and other stakeholders from the tourism industry. This activity can be organized in the form of an Iftar followed by a quiz night during Ramadan, lunch or dinner.

- Annual JRA Retreat

The association will organize an annual Board and Staff Retreat to accomplish the following objectives:

- Review the association's strategic direction
- Review the past year's accomplishments, drawbacks and challenges
- Review the association's Strategic Plan and suggest the inclusion of new programs and initiatives
- Conduct training sessions on association management to staff and board members

JRA members can be invited to attend parts of the retreat to have the opportunity to connect with the association's staff and leadership.

#### SECTION2: OUTREACH

#### 1. Outreach Strategy

The Membership Development and Outreach Department will help all departments in their effort to improve the association's image and credibility among members and stakeholders. The department will organize a brainstorming session during the annual retreat to identify its audience and conduct a thorough audience analysis.

#### JRA Audience

- JRA Members
- Jordanian Government (Ministry of Tourism and all relevant ministries)
- Hotels
- Donor Organizations
- Non Members (unclassified restaurants and other food establishments)
- Other Tourism Business Associations
- The Media

The audience analysis will aim to answer the following questions:

#### - Type of Audience

For example members representing 5, 4 and 3 star restaurants.

#### Objective towards audience

For example JRA aims at providing owners of 5, 4 and 3 star restaurants high quality training and advocacy services.

#### - Credibility established with the audience

#### - What's in it for Them?

What value does the association bring to the audience.

#### - Expected Qs & Os

Expected Questions and Objections the audience might have

#### - Desired Response

How would JRA like the audience to react to its services?

#### - Next Steps

The association would develop a plan based on the analysis and feedback provided by its audience.

#### 2. Raise Public Awareness

The Membership Development and Outreach Department will raise awareness on the programs and services implemented by the association's departments. This will be achieved through a professional orientation program for new members, the development of a quarterly newsletter, reviving the current web site and assisting the Investment and Business Development Department in producing special publications on the restaurant industry. The media will be used as a major tool to promote JRA's activities and services among members and other major stakeholders.

#### - New Member Orientation

Upon joining, members will be briefed by Heads of JRA Departments on the association's services. They will also meet with JRA CEO and receive a New Member Kit which would include the following items:

- Welcome letter from the Chairman
- Membership Privilege Card
- Membership Directory
- A Welcoming Gift (JRA promotional items)
- A copy of the JRA Newsletter
- Members Benefits Sheet
- JRA Committees Sheet
- JRA Brochure
- Any publications produced by the association
- Application form

#### <u>Quarterly Newsletter</u>

JRA will produce a quarterly newsletter to include information and updates about the industry, information on new members, members' news, upcoming events, and other relevant information about the tourism industry. The newsletter, which will be uploaded on the association's website, will be outsourced to a communications specialist who will be hired by JRA at an annual contract.

- <u>Website</u>

JRA invested in the design of a new website, but the site remains inactive and requires a comprehensive update. JRA staff will work with a communications specialist to update the website and offer each member a page to include information on their establishments (a photo and brief about the restaurant, latest menus and contact details).

- Publications

The Membership Development and Outreach Department will assist the Investment and Business Development Department in its effort to produce handbooks/booklets on licensing, registration, international best practices, starting a restaurant business, and other relevant publications. This effort would require assistance from experts in the hospitality sector.

#### 3. Media Relations

This department will be responsible for managing media during all JRA events. This would entail:

- Maintaining close contact with journalists
- Inviting the press to all JRA activities
- Writing and publishing press releases in English and Arabic
- Working with the Government Advocacy and Communications Department on writing feature stories on JRA's policy positions
- Developing press kits for each event

Department staff will also work closely with the Government Advocacy and Communications Department in its effort to organize special interviews with JRA leadership and spokespersons to communicate the association's policy positions. It will also organize press conferences following events when necessary. A media kit will be developed and updated regularly to be distributed to members of the media.

Department staff will assist the CEO in identifying professional media training for Board Members and JRA Spokespersons.

Note: All activities to be implemented by this department should ensure effective participation of women.

**Business Plan**

# **5.5 Finance and Administration**

# Objective 5: Work towards transforming JRA into a voluntary association with excellent operations, management practices and corporate governance

## FINANCIAL MANAGEMENT

The financial department issues on a monthly basis: a balance sheet, a statement of revenues and expenditures, statements of cash flows and breakdown of activities, incomes and expenditures.

The monthly balance sheet shows the financial status of the organization. The monthly statement of revenues and expenditures shows any surplus or deficit in addition to giving comparisons with the previous year. The statement of cash flows describes the liquidity status of the organization.

The analysis of the general and administrative expenses reflects the nature and amounts of the various expenses. The breakdown of activities, incomes and expenditures profiles the nature and fiscal results of the organization's activities.

JRA should purchase and install a new financial software (QuickBooks **Premier 2006 for NGOs)** that will help the association to further forecast and control the expenses and the revenues. JRA accountant and CEO should be trained to use this software efficiently.

### HUMAN RESOURCES MANAGEMENT

#### 1. Human Resources System

A comprehensive HR system should be developed to include systems for the following:

- Recruitment, Selection and Placement
- Salary Scale
- Employee Training and Development
- Employee Evaluation and Performance Appraisal
- Heath and Safety
- Organizational Structure
- Job Descriptions

Following is a detailed description of some of the important Human Resources functions that require expert assistance:

#### - Employee Evaluation and Performance Appraisal System

A full performance appraisal system should be developed and implemented every year in order to achieve the following objectives:

- Evaluate the employee's performance in all areas
- Determine an employee's strengths and weaknesses
- Evaluate an employee's leadership ability. This information is needed for possible promotion possibilities and succession planning
- Review and conduct necessary amendments/changes to job descriptions
- Maintain a good working relationship between managers and employees through employee evaluation and performance appraisal interviews

#### - Employee Training and Development Programs

As mentioned in the Staffing Plan above, this department will utilize the annual appraisal system to assess the needs of its staff to overcome their weaknesses and build on their strengths. Once the training needs of JRA staff have been identified, training courses that are common to all or a large number of staff members will be conducted to benefit all employees collectively. This will be done possibly within the framework of retreats.

#### 2. New Employee Orientation

New Employees should be given an orientation program to familiarize them with the association's programs and general policies and procedures. Each employee should have an Employee Manual, which consists of the following documents:

- Business plan
- Job Descriptions
- Rules and Regulations
- Benefits
- Vacations
- Salary, Bonuses and Deductions
- Personal Conduct
- Confidentiality Agreement

#### 3. Recruitment

This department is responsible for identifying and recruiting new staff under the supervision of the CEO and Board of Directors. Under the new proposed structure, JRA will be required to recruit senior staff (two staff members in January 2007, and two in January 2009) to implement the association's three-year Strategic Plan.

# INFORMATION TECHNOLOGY MANAGEMENT

The IT Infrastructure at JRA should be upgraded to include:

- New Hardware
- New Software
- Server

JRA should work to transfer its current website into a dynamic, interactive, bi-lingual and a full-service Internet portal, which will offer a single gateway for members and other interested parties to access integrated services and information. The portal will feature all JRA services, including an online matchmaking tool for members and potential investors. The profiles of JRA members will be included in the portal as a networking and promotional outlet for them.
