# Recipients—By World Bank Income Group (obligations)

 Lower-middle income countries received almost a third of all U.S. economic assistance, more than any other group.

SOURCE: USAID Foreign Assistance Database (http://gbk.eads.usaidallnet.gov/).

NOTES: World Bank Income Groups divide economies according to 2009 GNI per capita, calculated using the World Bank Atlas method. The groups are: low income, \$995 or less; lower-middle income, \$996–\$3,945; upper-middle income, \$3,946–\$12,195; and high income, \$12,196 or more.

Although not listed under the World Bank Income Groups, China (Taiwan) was included in high income and Serbia and Montenegro (Former) was included in upper middle income. The 'Not Specified' group includes all regional and global funding that could not be assigned to a specific benefitting country.

# **Implementing Partners (Channel of Aid Delivery)**

Funding agencies may choose to implement aid programs themselves or work with other organizations as implementing partners through contracts or other binding agreements. The U.S. government and multilateral organizations—such as the World Bank, United Nations, and World Trade Organization—implement roughly 60 percent of total U.S. economic assistance.

NOTE: 'Other' implementing partners include Church and Faith Based organizations, Universities and Research Institutes, and Public and Private Partnerships. Classification of implementing partners by type is subject to annual review due to improvements in foreign assistance data quality.
