**THE NIGER BOOKSHELF:**  
**A SELECTED BIBLIOGRAPHY ON AGRICULTURE IN**  
**THE WEST AFRICAN SEMI-ARID TROPICS**

Prepared by  
Patrick A. Jomini  
and  
Kim Dunn

80-5

April 5, 1989

Department of Agricultural Economics  
Purdue University  
West Lafayette, Indiana 47907

This research is supported by the U.S. Agency for International  
Development, Science and Technology Bureau, Technology of Soil Moisture  
Management Project under USDA PASA No. BST-4021-P-AG-108D-00.

## FOREWORD

The NIGER BOOKSHELF consists of a collection of documents relevant to the study of agriculture in the semi-arid conditions characteristic of Niger. These documents include:

- 1) journal articles
- 2) proceedings from meetings
- 3) edited volumes
- 4) software guides
- 5) publications internal to various research projects
- 6) consultant and USAID reports
- 7) annual reports of various organizations operating in the Sahel
- 8) drafts of current, relevant research

The collection centers primarily on Niger as a way to provide a service to Purdue researchers currently involved in the Niger Applied Agricultural Research Project. This collection may also serve as background material for those students interested in agricultural problems in the Sahel. Students using this material can appraise the current state of research in Sahelian regions and identify further needs.

While it is recognized that a lot of materials are produced in other languages, all documents currently collected are written in French or the majority in English. Items are classified in various categories. These, along with their corresponding codes are listed below.

<u>Primary Code</u>	<u>Classification Scheme for a Library on Semi-Arid Agricultural</u> <u>Category</u>
GC	I. Geography and Climatology
SS	II. Country and Sector Studies by country and year
AR	III. Annual Reports Research Organizations
FS	IV. Farming Systems (descriptive)
DV	V. Dryland Agronomy
DI	a. new varieties b. improved agronomy and purchased inputs
DPV	VI. Dryland Crop Production Economics
DPI	a. new varieties b. improved agronomy
IV	VII. Irrigated Agronomy
II	a. new varieties b. improved agronomy and purchased inputs
IPV	VIII. Irrigated Crop Production Economics
IPI	a. new varieties b. improved agronomy
AT	IX. Livestock and Animal Traction

---

<sup>1</sup> the help of J.H. Sanders and B.I. Shapiro in gathering materials is gratefully acknowledged.

RE	X.	Resource Economics
	XI.	Marketing
MI		a. inputs
MO		b. outputs
MT		c. international and regional trade
MC		d. cooperatives
FC	XII.	Finance and Credit
ME	XIII.	Methodology
EX	XIV.	Extension
MP	XV.	Mission Reports, Project Documents
FP	XVI.	Food Policy
D	XVII.	Drafts, Proposals, Prospectus of work in progress

Each item is coded with a 3 element code: {pc/ln/yr f}, where:

"pc"	is the primary code (see list above)
"ln"	is the first letter of the main author's last name
"yr f"	is the year of publication and <u>f</u> appears if the document is the French version of a document originally published in English.

The primary code is applied to a volume. Since some volumes contain articles or chapters by various authors and these articles are listed separately, the code may not always describe a particular citation. These codes are primarily used for classification and retrieval purposes, not for searching material in the database.

The references are recorded in WordPerfect, Version 5.0 in a format suitable for a reference list. An alphabetical catalog on paper and a disk containing the WordPerfect formatted catalog can be obtained. The list can also be provided in ASCII format.

In the future, a set of macros will provide users with the capability to search their catalog and produce lists of references that can center more closely on their topic. Users will also be able to control output format.

For now, searches by subject or code must be done manually, using the search <F2> key. In order to collect a number of references for further use, the following procedure may be used:

- 1) locate an item in the alphabetical listing
- 2) highlight item using <ctrl-F4,2> and copy it <2>
- 3) enter document 2 <shift-F3>
- 4) press <return> to retrieve
- 5) return to document 1, the original list, <shift-F3> and repeat these operations until satisfied that the search has yielded the necessary documents.

A new (sub) list has now been produced and can be printed <shift-F7> or ordered alphabetically <ctrl-F9>.
